

The Life Cycle of the Pukeko

by Betty Brownlie

Keynote

The life cycle of the pukeko comes alive with stunning images and educational text.

Description

Although ungainly in the air, pukeko are a common sight poking around near the swamps where they make their homes. Did you know that a female pukeko will choose the best-looking nest in which to lay her eggs – even if there are already eggs in it?

Betty Brownlie answers questions about pukeko and looks at fascinating phenomena in this illustrated and photographic book.

Selling points

- New title in the popular Life Cycle series
- Beautiful photographs and illustrations with easy-to-read, accessible text

About the author

Recognised for the high standard of her artwork, Betty has had a life-long fascination with the natural world that led her to embark on the first title in this series. Sadly RSI has restricted the amount of work she can undertake in recent years.
