

# CRAYON SCRATCH

## Materials:

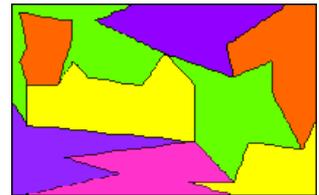

- 2 sheets of drawing paper 12 x 18
- Crayons
- Black water-based paint
- Paintbrush
- Newspaper
- Pointed object for scratching through paint layer to crayon layer.

## Objectives:

- Use strong shapes and strong colours to create visually interesting work.
- Experiment with the use of water-based paint and crayon.

## Procedure:

1. Completely cover paper with shapes of thickly applied crayon.

2. Paint over crayon with black water-based paint. Let this dry overnight.

3. Draw the outline of a simple animal on a second piece of paper. Cut this out and use as a pattern.

4. Place this on your black-painted paper. Use a sharp object and trace an outline of your animal into the paint. Cover your table top with newspaper because the next part will be messy.

# CRAYON SCRATCH

Procedure cont

5. Scratch away everything that is not the animal. Brush off your artwork and clean up all the little bits of black that you have scraped off your work.
