

Create-an-Alien Symmetry Activity

Fill your classroom
with amazing
symmetrical
aliens!

Equipment

- Coloured paper squares
- A3 art paper
- Glue
- Scissors
- Alien Body Parts BLM (page 2 of this download)

Method

- Fold a piece of coloured paper in half.
- Draw a line starting on the fold at one side, curving across the paper, and finishing on the fold at the other side of the paper.
- Cut along the line and unfold it.
- Glue the coloured paper onto the larger sheet of art paper. This will form the symmetrical body of the alien.
- Colour, then cut out various body parts from the following sheet. Glue these parts onto the body of the alien, so that the alien remains symmetrical.
- Once completed, they can name their aliens, and describe their habitats and behaviours.
