

Draw an imaginary animal that could live in a rainforest. What sort of food will it eat? Where will it live? How will it hide and protect itself from predators? What colour is it? What kind of teeth does it have? Does it have a tail? Does it find its food by using its eyes, its nose, or its ears? If it lives in the trees, how does it stop itself from falling? If it lives on the ground, does it run, climb, or dig? Make your animal as interesting as you can.
