

Name: \_\_\_\_\_

Class: \_\_\_\_\_

# The Water Cycle

Use the words in the list below to correctly label the water cycle.

run-off    transpiration    infiltration  
 condensation    evaporation    precipitation

Use the words in this list to fill the spaces in the statements below.

evaporation    never-ending    condensation    creeks    run-off    snow  
 oceans    precipitation    moisture    rain

Precipitation occurs when water falls from the sky in the form of \_\_\_\_\_, hail or \_\_\_\_\_.

The water cycle is given this name because the water goes round and round in a \_\_\_\_\_ cycle.

The first step in the water cycle is called \_\_\_\_\_.

Water that does not soak into the ground after precipitation is referred to as \_\_\_\_\_. This water will find its way into \_\_\_\_\_ and \_\_\_\_\_.

The Sun's heat causes \_\_\_\_\_.

Transpiration occurs when water \_\_\_\_\_ rises into the air from the leaves of plants.

\_\_\_\_\_ is the process that takes place when the invisible water-gas cools, clouds form and turn the gas into liquid.
