

Volcano Décor

Supplies:

- Roll of brown craft paper
- Roll of red plastic table cloth
- Cardboard
- Stapler
- Utility knife
- Scissors
- Tape
- Spray adhesive
- White LED holiday lights
- Binder clips

Directions:

1. Create the volcano shape out of cardboard, making sure to leave a lip at the top of the volcano opening. Tape and staple the structure to the wall.

2. Cover the volcano in crinkled brown craft paper. Tape and spray mount the paper in place.

3. Attach several strings of white holiday lights to the volcano lip with binder clips. Let the lights fall and create the path of the lava.

4. Drape a length of red plastic tablecloth over the lights. Tape the tablecloth to the inside of the volcano opening. Turn on the lights on to make the red tablecloth look like lava.

Note: For safety, always be sure to turn off the holiday lights when they are not attended.
