

# Dino-Mite Dinosaur Table Legs

## Supplies:

- 4' x 8" concrete form tubes (one tube equals two table legs)
- Handsaw
- Small foam balls (one ball per table leg)
- Utility knife
- Hot glue gun and glue sticks
- Green, blue, orange, and white paint
- Paintbrushes

## Directions:

1. Cut one concrete form tube in half with a handsaw, creating two 2' tall tubes for the dinosaur legs. *(For safety purposes, we recommend wearing leather gloves when using the handsaw. Never leave the handsaw where children can pick it up.)*
2. Cut a slit down the length of each dinosaur leg.
3. Cut a small foam ball into four identical wedge shapes with a utility knife. Repeat for each dinosaur leg.
4. Hot glue four wedges to the bottom of each dinosaur leg, creating the dinosaur toes.
5. Paint the legs and toes. Allow to dry.
6. Open the slit in each dinosaur leg a little wider and slide around the table legs, making sure the toes are facing out.
